Using what you have read, these maps, and what you already know, what inference can you make about the businesses in Pittsford over time?

Businesses in Pittsford changed over time to meet people’s needs. In 1902 the businesses are mostly having to do with farming and coal. The canal was used to ship the farmers produce, so those businesses are near the canal. The coal was used to power the boats, so it was near the canal to be near the boats.

Now the businesses in Pittsford are more recreational. There are many restaurants, a park, clothing stores and services, like the salon.
